

Shower Pans

A Foundation for a Better Shower

Wall Solutions Shower Pan is constructed of solid, durable, 2-inch-thick PVC core board and will not bend or flex under pressure. It installs quickly and easily with adhesive and is available in a variety of decorative stone designs to coordinate with Signature and Iconic Series Waterproof, Grout-Free Panels.

Engineered Performance:

- Durable 2.6 mm commercial-grade top layer increases longevity and adds slip resistance
- Flange and top layer are one continuous piece to prevent water penetration to surrounding areas
- Available in universal left/right side installation options for flexibility in drain configurations
- Engineered CNC-routed channels on the bottom to reduce weight and aid in glue adhesion
- Solid base is pre-sloped for efficient drainage

Installation, Compatibility & Care:

- No mortar needed. Simply apply adhesive to bottom side of pan and slide into alcove
- Handles on bottom side of base enable easy handling and installation
- Includes matching curb component and standard 2" compression-fit drain
- Cleans easily with household tile cleaners
- IAPMO Certified
- Limited Lifetime Warranty

Designed for Performance:

The shower pan curb component installs directly over the 1" flange that surrounds the shower pan base.

2.6 mm commercial-grade top layer:
0.04 mm UV-Cured Scratch Shield lacquer
0.55 mm commercial-grade wear layer
0.01 mm design PVC print film
2.00 mm extruded solid PVC

2"-high density rigid PVC core
