

REPRESENTATIVE MATTERS: CONSTRUCTION INDUSTRY

REAL ESTATE SOLUTIONS

- Asset manager for various apartment communities responsible for setting the scope and providing detailed oversight of significant capital improvement projects.
- Owner's representative and construction manager for a previously stabilized 155-unit apartment community in Baton Rouge, LA that was rendered uninhabitable after suffering substantial damage from unprecedented flooding. Scope of work included addressing immediate life and safety needs, winding down tenancy and property operations, deploying a recovery firm, and overseeing demolition and reconstruction while coordinating with flood and property insurers and adjusters. After reconstruction, we oversaw the property re-launch, lease-up and provided ongoing asset management.
- Receiver and Construction manager in the rehabilitation of a hurricane-damaged New Orleans apartment complex in the post-Katrina environment where labor, supplies and materials were all difficult to obtain.
- Receiver and Construction manager for a 100-year-old apartment complex with extensive damage from Hurricane Sandy in New Jersey. We rehabilitated the damaged and vacant property, obtained a new certificate of occupancy and released the property to obtain operational stability ahead of disposition in a difficult permitting environment.
- Receiver for a 143-key partially completed Cambria Suites Hotel in College Park, Georgia. The initial scope included: determining general contractor's ability to finish project; identifying extent of mold contamination and recommending appropriate remediation protocol; determining cost to complete project; and identifying issues with permits, architectural, and civil plans. Subsequently, we were hired to secure the site, perform a forensic audit of the FF&E and also serve as Construction manager for the dry-in of the building and mold remediation.
- Receiver and Construction manager for a variety of commercial assets [assisted living, retail, office and daycare] as well as numerous class C apartment complexes where we commissioned and managed significant water intrusion and/ or mold abatement projects including interior demolition [usually with asbestos contaminant] followed by property management and maintenance through disposition.
