Market Observations

Market Summary

Agriculture Market

The global agriculture sector entered 2026 with an estimated gross production value of approximately \$4.99 trillion, with structural bifurcation between crop and livestock subsectors defining Q1 performance. Soft commodity prices, persistent input cost inflation, and shifting trade flows shaped conditions across all major producing regions throughout the quarter. North American row crop producers faced the most acute pressure. Corn and soybeans were priced at \$4.21 and \$10.39 per bushel respectively, both near or below estimated breakeven levels. Fertilizer costs rose 10 to 20% year-over-year through January, with phosphate applications running approximately 20% below seasonal norms. A Middle East conflict in March closed a key shipping corridor, pushing U.S. nitrogen prices more than 20% higher between late February and mid-March, drawing regulatory scrutiny from federal authorities over pricing practices among major domestic producers. In contrast, the livestock sector outperformed. With the national cattle herd at its smallest size in 75 years, fed cattle prices averaged \$234 to \$238 per hundredweight, with supplies running 6 to 7% below prior-year levels. Avian influenza depopulated 15.2 million commercial layer birds through the quarter, though flock rebuilding was underway and egg prices declined 42% year-over-year by February. Consumer food prices rose approximately 2.3%, moderating from prior-quarter levels. In Europe, elevated energy and fertilizer costs weighed on grain markets, pressuring wheat production across key producing regions. Across Asia, China's soybean import program anchored global oilseed demand, while South and Southeast Asian markets faced food inflation linked to rice and edible oil supply tightness.

Public Company Valuations

The CFA Select Agriculture index increased by 17.0% in the first quarter of 2026, and the 12-month return on the Index also increased by 49.1%. The Grain/Oilseeds/Feed/Seed/Storage Index outperformed all other indices, posting a 23.9% increase in the first quarter of 2026. The same index recorded the highest median EBITDA multiple at 13.7x, while the Ag Equipment Manufacturers and Distributors Index reported the highest median revenue multiple at 1.9x. The Livestock Producers Index had the lowest median EBITDA and revenue multiple of 5.9x and 0.6x. The Ag Chemical Manufacturers and Distributors Index and the Ag Equipment Manufacturers and Distributors Index have recorded a median EBITDA multiple of 7.7x and 11.4x. The Grain/Oilseeds/Feed/Seed/Storage Index and Ag Chemical Manufacturers and Distributors Index recorded a median revenue multiple of 1.0x and 1.3x.

The public agriculture market showed an increasing growth in the first quarter of 2026...

Mergers and Acquisitions

Agricultural mergers and acquisitions activity in Q1 2026 reflected a broader shift toward deliberate consolidation, with deal flow spanning fresh produce, crop protection, and agricultural equipment. The quarter recorded fewer but larger transactions, with acquirers focused on supply chain integration, platform scale, and long-term cash flow visibility over volume. Notable transactions included Mission Produce's \$430 million agreement to acquire Calavo Growers in January, Anupam Rasayan India's \$150 million acquisition of Jayhawk Fine Chemicals in February, and RB Global's definitive agreement to acquire BigIron in March, a digital agricultural marketplace with approximately \$885 million in gross transaction value. Collectively, these deals reflected buyer preference for assets offering durable competitive positioning and identifiable synergies across the agricultural value chain.

Industry Trends

Biological Inputs Reshape Crop Protection and Input Economics

The biological and bio-stimulants segment sustained its growth trajectory into Q1 2026, with adoption accelerating as growers sought to improve nutrient uptake efficiency, reduce input waste, and build resilience against volatile procurement costs. Unlike conventional agrochemicals, biologicals help crops absorb and utilize nutrients more effectively, enabling producers to optimize input spend without compromising yield outcomes, a compelling value proposition amid compressed farm-level margins and elevated cost-of-capital. The segment's momentum is further supported by improving germplasm, as biological breeding continues to become less capital-intensive, lowering barriers to adoption across geographies and scale. Biological inputs are gaining parallel traction in field operations, as evidenced by Beck's deployment of Verdant Robotics' computer-vision weed-control system across its soybean operations. Concurrently, bioengineering emerged as the leading agriculture innovation theme of 2026, with genomically edited crops and sustainable agrochemicals attracting the largest share of startup activity and investor capital. This ran parallel to the broader shift toward carbon farming and regenerative agriculture, as institutional buyers and large-scale food companies formalized sourcing commitments tied to sustainability outcomes, reinforcing the commercial case for biological input adoption.

Precision Agriculture Adoption Accelerates as AI Transitions from Pilot to Field Standard

Heading into the 2026 planting season, North American dealers reported widespread adoption of GPS guidance, autosteer systems, and variable-rate application technologies, with operators integrating AI-driven agronomic forecasting and field scouting tools on top of established precision platforms. John Deere's Q1 results reflected this trend, with small ag & turf net sales up 24%, partly attributable to the Precision Essentials kit, which extended precision capabilities to farming operations of varying scale. In the venture market, AgTech recorded \$6.6 billion in deal value across 805 transactions in 2025, with Q4 capital ticking up to \$1.5 billion as investors concentrated positions in later-stage, AI-driven platforms across farm automation and crop inputs. Adoption is expected to continue at pace, with over 70% of large crop farms projected to implement satellite-based precision farming by year-end 2026. The convergence of compressed farm-level economics and demonstrated ROI from precision tools is accelerating consolidation among AgTech integrators and dealer networks, an area attracting meaningful interest from sponsor-backed roll-up platforms.

Trade Policy Volatility Driving Diversification of Global Grain Sourcing

U.S. agricultural trade flows remain disrupted following significant policy turbulence. On February 23, 2026, the Supreme Court struck down certain IEEPA-based tariff measures, and the administration responded within days by reimposing 15% baseline duties under Section 122 of the Trade Act. China has enacted retaliatory tariffs totalling 71.5% on U.S. soybeans and 74% on in-quota cotton, though approximately 12 million metric tons of U.S. soybeans were purchased by late January in fulfilment of a prior bilateral commitment. Canada faces 35% tariffs across most categories, while Mexico's 30% levy remains under a 90-day suspension. Brazil has emerged as the primary beneficiary of this diversification, recording a historic \$169.2 billion in agricultural exports in 2025. A coalition of 56 U.S. farm organizations submitted formal correspondence to Congress in January, citing acute pressures on farm-level viability and calling for a more predictable, rules-based trade framework. In this environment, grain trading and storage businesses with diversified export logistics, particularly those operating integrated barge-to-port infrastructure, are drawing increased strategic interest, as route optionality and export flexibility command a premium in asset valuations.

Significant News

U.S. Department of Justice Opens Investigations Into U.S. Fertilizer Market

CropLife, March 18, 2026

“With U.S. fertilizer prices increasing by up to 33% by some suppliers since February 28, 2026, the U.S. Department of Justice (DoJ) has launched a formal investigation into the domestic fertilizer market.”

Transaction Highlights

Notable Transactions

In March 2026, **Bunge Global SA** acquired the soy protein concentrate, lecithin, and soy crush businesses from **International Flavors & Fragrances, Inc. (IFF)**, including the Response, Alpha, Procon, and Solec brands. The transaction strengthens Bunge's oilseed processing and ingredients platform, expanding its portfolio of value-added protein ingredients for food and alternative protein applications, while enhancing its capabilities across global food and feed markets.

In July 2025, **Bartlett**, a Savage company, acquired **Ceres Global Ag Corp.** for approximately \$140 million in cash at \$4.50 per share, expanding its grain merchandising and storage capabilities with approximately 45 million bushels of additional capacity across 13 locations in Minnesota, North Dakota, Manitoba, and Saskatchewan, while deepening its position in spring wheat, durum, oats, and canola.

In February 2026, **JBS N.V.** acquired an 80% stake in a newly formed food holding company in Oman from **Oman Food Capital** for \$150 million in cash. The transaction consolidates key livestock processing assets, including the A'Namaa poultry plant and Al Bashayer beef and lamb facility. The acquisition strengthens JBS's geographic diversification strategy, expanding its presence in the Middle East and positioning Oman as a strategic halal protein production hub..

In January 2026, **China National Seed Group Co Ltd**, a subsidiary of Syngenta Group Co Ltd, acquired **Winall Hi-tech Seed Co Ltd** for approximately \$316 million in cash. The acquisition increases its ownership to approximately 40.51%, strengthening its position in hybrid seed development and enhancing its capabilities in agricultural biotechnology and crop innovation in China.

CFA Overview

About CFA

Who We Are / What We Do

Corporate Finance Associates (CFA) is an independent international investment banking firm serving middle-market businesses. For over 60 years Corporate Finance Associates has been advocating on behalf of business owners who are restructuring a company, either through divestiture, merger, acquisition or recapitalization. Combining the knowledge and leverage of a larger bank with the customer focused detail of a boutique firm, from inception to completion, our senior principals provide hands-on expertise to clients buying, selling or recapitalizing a business.

This Agriculture Industry Practice Group was established to draw on the experience of CFA advisors, many of whom as former business owners and CEOs, have first-hand knowledge and have completed many transactions in this industry. Working with your local CFA representative, you can be sure that the collective wealth of knowledge is available to every CFA client.

Sell-Side Advisory

Whether as a divestiture strategy or a recapitalization strategy selling all or part of a business requires equal parts creative thinking, critical analysis, expert advice, sound planning and flawless execution. Having the right team of investment banking professionals working for you is critical to ensure success.

Capital Markets

Our commitment to remaining independent from any investment or lending affiliates ensures that we deliver unbiased guidance. It also promotes maximum competition among lending sources, helping to fully leverage value for our clients. Our role is to help you raise the type of capital that best fits your needs.

Buy-Side Advisory

Growth through acquisition is a complex process. It involves strategy, planning, critical analysis, coordination and negotiation. When you want to take advantage of the fast growth offered by a consolidation or roll-up, CFA's broad reach, sources of financing and efficient closings can help you achieve your business growth goals.

Financial Advisory

Now that you have made the decision to raise capital for your business, choosing the right investment banker is critical. Whether you are buying out a partner, financing an acquisition or seeking growth capital, CFA is the right choice to help you achieve your financing goals.

Exit Planning

Every business will ultimately undergo a transfer via sale or merger, a charitable donation, a transfer to a child or relative or even bankruptcy, liquidation or death. Every ownership transfer carries with it a unique set of consequences and the best consequences usually begin with a clearly defined exit plan.

Business Valuation

"What is my business worth" is a question we often hear from business owners contemplating a business sale, merger or recapitalization. Answering this question depends on many factors, including the business valuation methods that are employed in the calculation.

Local Service, Global Reach

Where We Are

With offices across the USA and in Belgium, Brazil, Germany, Hong Kong, India, Ireland, Italy, Mexico, Netherlands, Spain, Switzerland and the United Kingdom providing middle-market companies with a wide range of M&A, financial advisory services and access to capital resources.

Delivering Results

Founded in 1956 • 70 Managing Directors • 37 Offices Worldwide • Billions in M&A Transactions

Industry Practice Groups

Agriculture

The Agriculture practice group is comprised of accomplished dealmakers with extensive experience in advising both public and private companies in the industry. These dealmakers offer expert service in acquisitions, divestitures, financing, and strategic planning to a wide range of companies operating in multiple subsectors including:

- Ag Chemical Manufacturers and Distributors
- Ag Equipment Manufacturers and Distributors
- Grain/Oilseeds/Feed/Seed/Storage
- Livestock Producers

Whether you want to acquire, merge, sell, or finance, let CFA's industry knowledge, international resources and proven dealmaking skills work for you. We research, identify, qualify, advocate, negotiate and help steer you through the mine fields of due diligence to maximize your value and secure your objective.
