## Certificate of Drinking Water Analysis

**Prepared for:** LunsPro Home Inspections  
5174 McGinnis Ferry Rd #136  
Alpharetta, GA 30005

**Phone:** (770) 483-2808  
**Email:** inspections@lunspro.com

**Test Address:** **Lab COC #:**

**Date Collected:** 06/14/22  
**Analysis Date:** 06/21/22

**Receive Date:** 06/15/22  
**Report Date:** 06/21/22

**CONCLUSION:** Your drinking water **PASSED** all of the Environmental Protection Agency's (EPA) established Primary (health-related) Drinking Water Standards for human consumption. These primary standards must be met for water potability required by FHA/HUD.

**Sample Location:** KITCHEN

Tested Contaminant	Results	Acceptable Range	Determination
E. coli bacteria	ABSENT	Zero	<b>PASS</b>
Coliform bacteria	ABSENT	Zero	<b>PASS</b>
Lead	None Detected	0 to 14.99 ppb	<b>PASS</b>
Nitrate as Nitrogen	None Detected	0 to 10 ppm	<b>PASS</b>
Nitrite as Nitrogen	0.04 ppm	0 to 1 ppm	<b>PASS</b>

A handwritten signature in black ink that reads "John D. Shane".

Approved by: John D. Shane Ph.D., Laboratory Manager

The Environmental Protection Agency (EPA) is responsible for the National Primary Drinking Water Regulations ([national primary regulations](#)). These regulations are health-related standards that establish the Maximum Contaminant Levels in drinking water. However, the EPA does not regulate private drinking water wells or private water supplies. These water sources are not subject to EPA standards. Some state or local governments do set rules to protect users of these types of water supplies. It is the responsibility of the homeowner to maintain the safety of their water. Information to help homeowners care for their private wells and protect their health can be found at [epa.gov/privatewells](#).

Analysis performed by Florida-Spectrum Laboratories, Inc. NELAP #E86006
