A MESSAGE FROM THE EXECUTIVE DIRECTOR OF MMERI

Three Successes Highlight Our Commitment to Educate, Engage and Communicate

Education. Community Engagement. Communications. These are the essential components of Florida A&M’s Medical Marijuana Education & Research Initiative (MMERI), and they are interconnected. We could not successfully implement one without the other two, as MMERI’s mission requires my staff and I “to educate, inform and engage Florida’s diverse population about medical marijuana and the impact of the unlawful use of marijuana.”

Highlighting the third quarter of Fiscal Year 2020-21 were the following successes that speak to the MMERI program’s commitment:

Between January and March, we anchored our public education outreach on monthly campaigns focused on specific subjects related to cannabis. The topics attracted live audiences to the Conversations on Cannabis virtual forums live streamed on social and digital media channels. Additional campaign outreach in the form of public service announcements, e-newsletters, newspaper articles, social and digital media posts, podcasts and videocasts engaged tens of thousands of people in Florida’s geographically and demographically diverse communities of color. They participated, watched, listened, read, shared, commented or asked us questions on MMERI’s channels. In addition, we saw a number of people outside of the state use MMERI’s public information and resources to learn more about cannabis in Florida.

In February, we launched an initiative that has been on my “things-to-do list” for some time, the MMERI Student Practicum Experience. I am very excited about this program because it offers participating FAMU undergraduates the opportunity to gain actual work experience, aiding their professional and academic development. It is important that MMERI develop a community of learners to provide organized learning support with the overall goal of enhancing the academic experience and improving academic performance. The students also will help us carry out and expand our mission as mandated under Section 381.986, Florida Statutes, to educate minorities and Floridians “about marijuana for medical use and the consequences of unlawful use of marijuana.”

We also saw our Train-the-Trainer program grow with 34 new participants. This program prepares a culturally and ethnically diverse group of people to become trainers who provide instruction of our Basic Medical Marijuana Education course to targeted minority communities throughout Florida. I hope to see this program expand with more trainers and the full-scale launch of our Intermediate Medical Marijuana Education course.

Finally, I am very proud to report that I submitted an abstract in the subject category of “Educational Quality Improvement” that was selected for presentation at the inaugural Cannabis Clinical Outcomes Research Conference. The event was hosted by the University of Florida-led Consortium for Medical Marijuana Clinical Outcomes Research on April 8-9, 2021.

It is initiatives like these that help us build our reputation as a vital resource in the cannabis space and further ensure that we stay true to our three core components — Education. Community Engagement. Communications.

Sincerely,
Patricia Green-Powell, Ph.D.
Executive Director, MMERI
EXECUTIVE SUMMARY

MMERI PROGRAM OVERVIEW

Florida A&M University (FAMU) established the Medical Marijuana Education and Research Initiative (MMERI) to educate minorities about marijuana for medical use and the impact of the unlawful use of marijuana on minority communities. Funding is provided by the Florida Department of Health at the direction of the Florida Legislature.

Given the University’s historical role in educating minority students, FAMU is in a unique position to educate Florida’s diverse minority populations about medical marijuana. MMERI is operating under the following mandate from the Legislature: “Educate Florida’s diverse minority communities about medical marijuana and the impact of the unlawful use of marijuana on minority communities.”

See Appendix B to read Section 381.986, Florida Statutes (F.S.)

MISSION

To educate, inform and engage Florida’s diverse population about medical marijuana and the impact of the unlawful use of marijuana.

VISION

Florida A&M University (FAMU) is the catalyst for statewide education and outreach efforts that ensure Florida’s multicultural and multigenerational communities are knowledgeable about medical marijuana and the impact of the unlawful use of marijuana.

GOALS

- Educate Florida’s diverse minority communities about medical marijuana and the impact of the unlawful use of marijuana
- Increase the body of research that promotes and advances knowledge about medical marijuana and the impact of the unlawful use of marijuana
- Conduct ongoing assessment and evaluation of the effectiveness and impact of the MMERI program

EDUCATION

Historically, FAMU has played an outstanding role in educating minority students. Therefore, it is in a unique position to educate Florida’s diverse minority populations about medical marijuana and the impact of the unlawful use of marijuana, while developing and delivering curriculum and certified training programs to increase knowledge and understanding of these subjects.

COMMUNITY ENGAGEMENT

Community engagement and education are integral parts of this initiative. To reach target populations, MMERI is implementing activities, building and expanding relationships and partnerships, and collaborating with leaders, community groups, faith-based organizations, educational institutions and others.

COMMUNICATIONS

Partnerships and collaborations with broadcast outlets and other media generate timely delivery and dissemination of relevant information to communities across Florida. A statewide messaging campaign includes the use of various digital, audio, visual, print and in-person platforms to educate key audiences and stakeholders.

*Cumulative data for first, second and third quarter FY 20/21*
EDUCATION

Historically, Florida A&M University has played an outstanding role in educating minority students and is uniquely positioned to educate Florida’s diverse minority populations about medical marijuana and the unlawful use of marijuana, as well as develop and deliver curriculum and certified training programs.

Train-the-Trainer Program Expands

In the third quarter, MMERI’s Train-the-Trainer program grew to a record 34 trainers across Florida. Trainers are MMERI’s boots on the ground providing instruction of the Basic Medical Marijuana Education course in communities across these 18 Florida counties: Alachua, Baker, Bradford, Citrus, Columbia, Dixie, Gilchrist, Hamilton, Hernando, Jefferson, Lafayette, Madison, Marion, Palm Beach, Putnam, Suwannee, Taylor, Union.

Basic Medical Marijuana Education Course Keeps Growing

Since its inception in 2019, the Basic Medical Marijuana Education course has been one of MMERI’s most successful education and engagement resources. Through the third quarter of FY 2020-2021, course participation reached 4,312, representing diverse groups of ages, ethnicities, and geographical areas throughout Florida and beyond.

In the third quarter, the free, noncredit online course recorded 912 participants, including 159 Florida A&M students who were invited by faculty to complete the curriculum through the Canvas virtual classroom portal.

Dr. Phyllis Gray-Ray and Dr. Helen M. Brethauer-Gay, professor and associate professor, respectively, of sociology and criminal justice, said they encouraged students in their classes to take the basic course to give them a better understanding of medical marijuana.

“I thought they should learn about medical marijuana because the course would clear up some of the misconceptions they have about it,” said Dr. Gray-Ray. “There is a lot of misinformation out there, and I wanted them to get some facts on the differences between medical and street level marijuana.”

Dr. Brethauer-Gay said she thought the course offered students in the four classes she was teaching — Deviant Behavior, Introduction to Sociology, Social Statistics and Medical Sociology — the opportunity to dig deeper into the marijuana issue.

“There’s still a lot we don’t know about marijuana, and since it’s now legal for medical purposes and may soon be legal for recreational use, I think they need to learn about the effects of this drug,” she said.

A large majority of the participants who have completed the post-course survey expressed a high level of satisfaction with this learning experience and agreed that it helped them take a more positive view of medical marijuana.
The third quarter of FY 2020–2021 saw the launch of a pilot program that engages Florida A&M undergraduates to help enhance, expand, and improve MMERI’s mandate to educate minorities about medical marijuana and the consequences of the unlawful use of marijuana. MMERI seeks to develop a community of learners and provide a space and a structure for students to align around a shared goal. Student learning communities are often cited as a high-impact practice in efforts to improve student success in higher education.

Students who participate in learning communities have higher grades, find opportunities to interact with faculty, get involved in campus activities and events, and report greater satisfaction with their overall college experience.

Developed by Executive Director Dr. Patricia Green-Powell, the MMERI Student Practicum Experience offers a selection of student scholars the opportunity to get involved in the program and share their perspectives on improving its core components — education, community engagement, and communications. Nine students from five colleges or schools — Agriculture and Food Sciences, Education, Journalism and Graphic Communication, Allied Health Sciences, and Social Sciences, Arts and Humanities — were selected to participate in the semester-long pilot.

“Students have been so enthusiastic about this experience,” said Dr. Green-Powell. “This program will encourage student involvement in what we do at MMERI,” said Dr. Green-Powell. “The Florida A&M student body is a target audience of ours, so it makes perfect sense to tap into this resource to help the MMERI program expand its reach and become more effective in reaching minority communities across the state.”

The MMERI program drew global interest as an exhibitor in the inaugural Enterprise Florida International Trade Expo, a multi-sector virtual showcase of the state’s leading export products and services, including medical marijuana. MMERI was one of 179 exhibitors that participated in the Expo.

Florida A&M University was the only public Historically Black College and University invited to participate in the Expo and used the opportunity to educate an international audience about its Medical Marijuana Education and Research Initiative.

Over the three-day event, March 16-18, virtual attendees engaged with MMERI and FAMU staff via live chat, inquiring about either the program, medical marijuana or the university.

The Expo platform remained online for 30 days after the end of the interactive event. According to Enterprise Florida, the virtual event attracted 5,589 total attendees from 118 nations.

“We got interest from people who live all over the world,” said Dr. Patricia Green-Powell, Executive Director of MMERI.
COMMUNITY ENGAGEMENT

CONVERSATIONS ON CANNABIS VIRTUAL FORUM

Conversations on Cannabis virtual forum invites viewers to engage program guests in discussions on medical marijuana and the impact of the unlawful use of marijuana. Live-streamed on Facebook and YouTube, each program features stakeholders and/or experts in fields such as health care, business, law enforcement, theology or other professions. This quarter, virtual forums were held in January, February and March, drawing more than 2,000 views on multiple streaming platforms.

January Virtual Forum:
Marijuana in the Workplace with Attorney Kamilah Perry

This program aired live on January 28 and featured attorney Kamilah Perry as the guest expert. Perry is a partner in a private practice and also serves as executive director and general counsel for the Office of the State Attorney, Ninth Judicial Circuit, which includes Orange and Osceola counties. She discussed Florida’s medical marijuana law and how it pertains to employment, cautioning viewers that employees being legally treated with cannabis are still vulnerable to termination for using the drug. More than 770 people this quarter participated in the live virtual event or watched the recorded program posted on MMERI’s Facebook and YouTube pages. The session drew more than 65 comments from viewers.

February Virtual Forum:
Marijuana as Medicine with Drs. Janice Knox, Genester Wilson-King, Angela ‘Kaya’ Ledbetter

Live streamed on February 25, this program brought together three nationally recognized experts on cannabis and how it’s used as a medical treatment. Drs. Janice Knox, Genester Wilson-King and Angela ‘Kaya’ Ledbetter offered insights into cannabinoid therapy and discussed barriers that keep people of color from considering cannabis as a legitimate medical treatment. More than 196 people participated in the live virtual event, with the recorded session generating 1,010 views before the end of this quarter. The session drew more than 155 comments from viewers.

March Virtual Forum:
The Business of Marijuana with Roz McCarthy, Erik Range and Rebecca Colett

On March 25, three successful entrepreneurs—Roz McCarthy, Erik Range and Rebecca Colett—talked about why and how they got into the medical cannabis industry. They also discussed the industry’s lack of diversity and inclusion and offered suggestions for minorities thinking about entering the legal cannabis space. This forum was developed in response to a growing number of questions MMERI receives from the public about gaining access to career and business opportunities in Florida’s growing medical marijuana industry. More than 124 people participated in the live virtual event, with the recorded session generating 310 views before the end of this quarter. The session drew more than 60 comments from viewers.
Organizations across the country are recognizing MMERI as a leader in providing the public with information and resources about cannabis. As such, MMERI Executive Director, Dr. Patricia Green-Powell served on several virtual events as an invited speaker in the third quarter.

PRESENTATIONS ON STATE AND NATIONAL PANELS ABOUT MARIJUANA

Speaking engagements this quarter included:

- January 7: FAMU-MMERI / Train-the-Trainer with the MOSAIC GROUP | 9 Participants
- January 13: Gadsden County Community Health Council Zoom Meeting | 35 Participants
- February 10: Gadsden County Community Health Council Zoom Meeting | 47 Participants
- February 16: FAMU Law Presentation with Dr. Erica Lindsay | 18 Participants
- February 20: MMERI Student Practicum Program | 19 Participants
- February 23: CCDWC Black History Celebration | 51 Participants
- March 10: Gadsden County Community Health Council Meeting | 32 Participants
- March 4: iLead Women in Leadership Roundtable | 36 Participants
- March 10: Gadsden County Community Health Council Meeting | 32 Participants
- March 23: Gadsden County Mental Health Meeting | 32 Participants
- March 24: Medical Marijuana Registry Planning Group | 14 Participants

COMMUNICATIONS

MMERI leverages multiple media platforms to provide minority communities throughout Florida with factual information on the state’s medical marijuana law and inform them of the potential consequences of the unlawful use of marijuana. A comprehensive communications strategy supports and promotes MMERI’s education and community engagement activities. This holistic approach to public education has established Florida A&M as a leading authority on medical marijuana and a trusted resource on the legal and illegal uses of marijuana.

COMMUNICATIONS

CANNABIS CAMPAIGNS ADDRESS ISSUES AND TOPICS REQUESTED FROM DIVERSE AUDIENCES ACROSS FLORIDA

As MMERI’s reputation as a trusted source for marijuana education grows, so too, does the number of requests the program receives from people seeking information on various topics, issues and concerns. In response, during the third quarter, MMERI launched campaigns that addressed marijuana in the workplace, marijuana as medicine, and confusion over state laws on legal and illicit use. All of the campaigns were anchored by a Conversations on Cannabis virtual forum featuring expert guests who provided resources, information and insights on their respective topics.

In addition to posting and sharing the campaign information on its own channels, MMERI expanded its reach to diverse audiences statewide by leveraging a growing number of media partners, including iHeartMedia, the Florida Association of Broadcasters, and several minority-owned media outlets across the state. These partners used multiple media channels to deliver information and resources to Floridians in English, Spanish and Haitian-Creole. The campaigns’ remarkable results are noted in the following pages.

STREET TEAMS ENGAGE HARD-TO-REACH AUDIENCES

A group of people assembled in the form of street teams to share information about the MMERI program across the state. Employed by iHeartMedia, these highly specialized teams engaged hard-to-reach populations in sometimes hard-to-reach places. Targeted locations included bars, clubs, churches, malls, train and bus stations, and rural communities.

*Data Source: Estimates provided by iHeartMedia
While there’s a growing movement within Florida and other states to relax marijuana laws, the federal government still treats it — irrespective of medicinal or recreational use — as an illegal substance. Tampa-based criminal defense attorney Patricia Dawson and Police Chief Terence Calloway, the assistant vice president of safety at Florida A&M University (FAMU), addressed why this dichotomy can cause confusion and potentially lead to problems.

During this campaign, Dawson explained why a medical marijuana patient in Florida could still run into difficulty with federal laws in certain circumstances. For example, people can’t use medical marijuana in a lot of places, like on public transportation or a public university campus. She suggested that the best place to use medical marijuana is at home.

When it comes to illegal (recreational/adult-use) marijuana, Chief Calloway strongly suggested not smoking it while riding in a car because of the risk of being pulled over by police. He said the smell of burnt cannabis could lead to serious consequences.

Chapter 893 Section 13 Florida Statutes (F.S.) details the state’s prohibited acts and penalties for unlawful marijuana use.

Several news stories across Florida highlighted a conflict between medical marijuana patients and employers with drug-free workplace policies. When a military veteran employed as a high school administrator refused to stop using medical marijuana for chronic pain related to a combat injury, he was fired by the local school board.

During this month-long campaign about marijuana and the workplace, attorney Kamilah Perry provided insights on Florida’s labor and employment laws. She explained that medical marijuana users aren’t protected under any federal or state anti-discrimination laws. Any employer in Florida, private or public, is within its rights to terminate an employee who tests positive for legally using medical marijuana, or even acknowledges using it.

Attorney Perry also talked about proposed legislation that would extend workplace protections to medical marijuana patients. She believes private employers in Florida are trying to accommodate employees being treated with medical marijuana as long as they don’t pose a safety risk to coworkers or themselves.

More than 2,500+ doctors in Florida are qualified to order medical marijuana and low-THC cannabis for patients with qualifying conditions. Dr. Genester Wilson-King, a board-certified gynecologist, is one of them. She is also among the growing number of minority physicians across the country working to help people of color consider the therapeutic benefits of cannabis.

Dr. Wilson-King, along with Dr. Angela “Kaya” Ledbetter, a board-certified emergency medicine physician in Houston, and Dr. Janice Knox, who is a nationally recognized endocannabinologist and board-certified anesthesiologist in Portland, Ore., were featured in a campaign about their experiences recommending medical marijuana as a treatment to their patients. All are involved in the Cannabis Health Equity Movement and its recently launched Association for Cannabis Health Equity and Medicine (ACHEM), which is focused on educating health professionals and healers in a nationwide effort to raise awareness about cannabis use in the health care treatment of Black, Indigenous and people of color (BIPOC).

According to the doctors, many minorities are hesitant to accept cannabis as a medical treatment because of its criminal reputation. While some states have legalized it, medical marijuana is still illegal at the federal level. They say having a qualified physician who looks like them, and is knowledgeable about the effects of medical marijuana, can help remove the stigma of cannabis use and help minority patients determine if it’s the right treatment for them.
MMERI OUTREACH and PUBLIC EDUCATION MATERIALS

WHAT YOU NEED TO KNOW ABOUT MARIJUANA IN FLORIDA

Medical Marijuana is Legal

What is medical marijuana?

Medical marijuana is a form of cannabis plant that contains THC (tetrahydrocannabinol) as well as other cannabinoids.

Is medical marijuana legal in Florida?

Yes. The Compassionate Medical Marijuana Act of 2014 in Florida makes medical marijuana patients eligible for access to THC in its various forms and in its various formats.

What are the qualifying conditions to use medical marijuana in Florida?

- Cancer
- Epilepsy
- MS
- Pond
- FSHD
- Anandamide (endocannabinoid system or ECS) abnormality
- PTSD

Where can medical marijuana be prescribed in Florida?

- General practitioners
- Internal medicine
- Pain specialists

Medical marijuana is available from the system and local pharmacies.

A medical marijuana card is authorized by a doctor to purchase and use cannabis.

TALK

FAMU Medical Marijuana Education and Research Initiative (MMERI) at Florida A&M University (FAMU)

WHAT IS MMERI?

FAMU’s Medical Marijuana Education and Research Initiative (MMERI) is the only program mandated by the state to educate and engage Floridians, especially diverse populations, on the subject of medical marijuana and the unlawful use of recreational marijuana. MMERI seeks to educate, inspire them to learn, and create opportunities to talk frankly about cannabis.

THE FOLLOWING MEDIA PARTNERSHIPS AND COMMUNICATIONS
CHANNELS DELIVERED THESE CAMPAIGNS TO MINORITY POPULATIONS STATEWIDE.

iHEARTMEDIA CAMPAIGN PARTNERSHIP

iHeartMedia is one of the largest media companies in the United States. As a media partner with MMERI, the conglomerate posted monthly campaign content on social and digital media, and placed hundreds of ads on websites, mobile devices, apps and streaming devices, reaching and engaging diverse audiences in 361 cities across Florida.

Paid Advertising

MMERI’s campaign content was placed across multimedia channels in a mix of digital display and social media ads designed to drive target audiences to MMERI’s online channels, live streams and virtual forums.

Ultimate Experience Promotions

The monthly MMERI campaigns reached diverse audiences across Florida through iHeartMedia’s popular and highly publicized Ultimate Experience promotions. As a partner, MMERI also raised awareness of its public education programs and drew attention to its social and digital media platforms, where audiences could register to attend the Conversations on Cannabis virtual forums and take the Basic Medical Marijuana Education course.

MINORITY NEWSPAPER OUTREACH

To promote its public education programs and monthly campaigns, MMERI coordinated the placement of paid content and advertisements in newspapers targeting the Black and Hispanic communities. This quarter, ads and editorial content were published in printed newspapers and posted on their websites and social media platforms, as well as shared with their e-newsletter subscribers.

*Data Sources: Circulation estimates provided by the newspaper publishers and staff

MMER PODCASTS

MMERI Radio Forums and the new Conversations on Cannabis virtual forums are featured as podcasts on the iHeartRadio digital network and mobile app.

MINORITY RADIO OUTREACH

MMERI coordinated the placement of paid content and advertisements in radio stations targeting the Black and Hispanic communities. This quarter, radio advertisements were played on stations in Hillsborough, Pasco, Hernando, Pinellas, Leon, Palm Beach, Indian River, Miami-Dade and Collier counties.

Radio stations

MINORITY RADIO OUTREACH

MMERI E-NEWSLETTER

This quarter, MMERI saw more people signing up to receive its monthly e-newsletter. The content is consumer-focused while providing public education about cannabis. Content includes a feature article about the monthly campaign topic, the latest marijuana news in Florida and around the country, and a section featuring comments from people who have connected with MMERI through its community engagement activities. There has been an increase in the number of e-newsletter recipients, noticeable audience engagement, and positive feedback from stakeholders.

In addition, FAMU Communications sends the monthly Conversations on Cannabis e-newsletters to the university’s main portal, FAMUInfo. This platform reaches more than 12,000 people in the university’s email system, which includes faculty and students.

AUDIENCE REACH & ENGAGEMENT in the THIRD QUARTER (JANUARY - MARCH 2021)

The following data represents the estimated* number of people reached and engaged from the programs and activities implemented within the MMERI components in the third quarter of FY 2020-2021.

**Mixed/Other** is defined as people from two or more races.

*Estimated total reach based on data collected by MMERI staff and provided by program partners, media outlets, and vendors

Aggregated data of audiences reached and engaged from the following public education programs and activities:

- Online Education Surveys and Assessments
- Community Outreach
- Television Outreach
- Radio Outreach
- Print Outreach
- Digital Media Outreach
- Social Media Outreach

**Note:** The U.S. Census Bureau Data, and Nielsen’s cume rating estimates on Florida’s 10 media markets were used to estimate the number and percentages of potential minorities reached over the campaign period.

**Radio and Television Public Service Announcements (PSA)**

MMERI and its media partners produced new radio and television public service announcements (PSAs) about mental health and cannabis and placed them on iHeartRadio stations and the Florida Association of Broadcasters public education campaign. Both placements blanketed the state’s airwaves with information about mental illness and the impact of the unlawful use of marijuana.

Through the Florida Association of Broadcasters, the English and Spanish-language PSAs aired on 143 radio and 50 television stations in 10 major media markets across Florida:

- Fort Myers-Naples
- Gainesville-Ocala
- Jacksonville
- Miami-Fort Lauderdale
- Orlando-Daytona Beach-Melbourne
- Panama City
- Pensacola
- Tallahassee
- Tampa-St. Petersburg-Sarasota
- West Palm-Fort Pierce

Using data from the U.S. Census Bureau and Nielsen, the estimated potential television reach statewide from January - March 2021, was 3,102,468 viewers, and the estimated potential radio reach was 2,812,541 listeners.*

Of those estimated television viewers, 502,306 were African American; 731,584 Hispanic; 1,732,305 White; 81,475 Asian; 54,798 Mixed. Of those estimated radio listeners, 460,118 were African American; 675,225 Hispanic; 1,554,150 White; 73,788 Asian; 49,260 Mixed.

*The U.S. Census Bureau Data, and Nielsen’s cume rating estimates on Florida’s 10 media markets were used to estimate the number and percentages of potential minorities reached over the campaign period.

---

**Television Reach (estimated)**

- 54,798 Mixed viewers
- 81,475 Asian viewers
- 1.7 million White viewers
- 2.8 million total listeners
- 3.1 million total viewers
- 731,584 Hispanic viewers
- 502,306 African American viewers
- 675,225 Hispanic listeners
- 460,118 African American listeners
- 73,788 Asian listeners
- 1.6 million White listeners
- 49,260 Mixed listeners

**Radio Reach (estimated)**

- 2.8 million total listeners
- 1.6 million White listeners
- 73,788 Asian listeners
- 49,260 Mixed listeners
- 675,225 Hispanic listeners
- 460,118 African American listeners
- 1.7 million White viewers
- 81,475 Asian viewers
- 3.1 million total viewers

---

**Florida Association of Broadcasters Public Education Campaign**

Between January 1 and March 31, 2021, more than 21,000 radio and television PSAs were aired statewide.

Through the Florida Association of Broadcasters, the English and Spanish-language PSAs aired on 143 radio and 50 television stations in 10 major media markets across Florida:
APPENDIX A
MMERI Oversight Committee and Advisory Committee members

MMERI OVERSIGHT AND COMPLIANCE WORKGROUP
The MMERI Oversight and Compliance Workgroup was formed in 2019 and charged with a mandate to monitor four key areas of the Medical Marijuana Education and Research Initiative:

1. Fiscal Affairs/Reconciliation
2. Achievement of Project Goals and Fulfillment of Mission
3. Impact and Assessment
4. General Compliance

The panel includes 12 members of FAMU faculty and staff and is led by the Principal Investigator of MMERI, Charles Weatherford, Ph.D., Vice President for Research, Professor of Physics and Director of Center for Plasma Science and Technology. The workgroup meets monthly.

WORKGROUP MEMBERS
Herbert Bailey
Assistant Vice President for Fiscal Management

Pamela Blount
Director, Contracts & Grants, Division of Research

Glory Brown
Director, Office of Sponsored Programs

Rica Calhoun
Chief Compliance and Ethics Officer, Office of Compliance and Ethics

Derrick B. Coffin, Ph.D.
Associate Vice President for Research, Division of Research

Maurice Edlington, Ph.D.
Professor and Provost/Vice President Academic Affairs

Patricia Green-Powell, Ph.D.
Executive Director, MMERI

Cynthia Hughes Harris, Ph.D.
Chair of MMERI’s Research and the Dean of School of Allied Health Sciences

GP Mendie
Budget-Program Manager, MMERI

David Self, Esquire
Associate General Counsel

Charles Weatherford, Ph.D.
Principal Investigator of MMERI, Vice President for Research, Professor of Physics and Director of Center for Plasma Science and Technology

Michelle Wilson
Coordinator of Education, Training and Community Engagement

MMERI EXTERNAL ADVISORY COUNCIL (MMERIEAC) MEMBERS
This 11-member volunteer panel serves as an impartial and objective advisor to the leadership of the Medical Marijuana Education and Research Initiative. With its membership of well-respected active and retired professionals from myriad fields of endeavor, the Council is able to provide unique perspectives as MMERI builds on its successes and identifies new opportunities. A key responsibility of membership is helping MMERI make connections with community leaders and potential partners in minority communities. The group meets three times a year and each member is required to participate in at least two MMERI activities annually.

COUNCIL MEMBERS
Na’im Akbar, Ph.D.
Author, public speaker, retired clinical psychologist

Gloria Anderson
Former director of the Smith-Williams Service Center, Tallahassee

Valeria Robinson Baker
Consultant pharmacist

Edward L. Clark II, DrPH, MSW
Program Evaluator, Bureau of Chronic Disease Prevention at Florida Department of Health

Patricia Dawson
Chair of MMERIEAC, solo practitioner of the Law Office of Patricia Dawson, P.A.

Patrick Mason, Ph.D.
Professor of Economics and Director of African American Studies Program, Florida State University

B. Virginia King, MPA
Program Administrator

Michelle M. Wilson
Coordinator of Education, Training and Community Engagement

Brian J. Howard
Assistant Director, Office of Communications

APPENDIX B
MMERI TEAM
Dr. Patricia Green Powell
Executive Director

GP Mendie
Budget & Program Manager

Dr. Bhavin Patel
Consultant and physician

Patricia Snyder, Ph.D.
University of Florida distinguished professor

Barney Spann
Vice President, Wells Fargo Bank, and co-owner of Avela Day Spa, Jacksonville

Rev. Lonnie D. Wesley, III
Pastor of Greater Little Rock Baptist Church, Pensacola

Sheriff Morris A. Young
Gadsden County, Florida

APPENDIX C
How Florida’s Medical Marijuana Law Led to the Creation of MMERI at FAMU
Section 381.986, Florida Statutes (F.S.), better known as Florida’s medical marijuana law, includes a funding provision that entrusts Florida Agricultural and Mechanical University with “educating minorities about marijuana for medical use and the impact of the unlawful use of marijuana on minority communities.” The following excerpt from the statute set in motion the creation of FAMU’s Medical Marijuana Education & Research Initiative. To read the entire statute, go to http://www.leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&URL=0300-0399/0381/Sections/0381.986.html

IDENTIFICATION CARDS.—

(d) Applications for identification cards must be submitted on a form prescribed by the department. The department may charge a reasonable fee associated with the issuance, replacement, and renewal of identification cards. The department shall allocate $10 of the identification card fee to the Division of Research at Florida Agricultural and Mechanical University for the purpose of educating minorities about marijuana for medical use and the impact of the unlawful use of marijuana on minority communities. The department shall contract with a third-party vendor to issue identification cards. The vendor selected by the department must have experience performing similar functions for other state agencies.
