APPLICATIONS

All floors must be fully cured and dry. Our non-breathable floor protection can be applied to finished and fully cured surfaces.

For laminate, wood, tiles, LVP, concrete and hard dry surfaces.

For all painting, construction, renovation, restoration, remodeling, cleaning, remodeling work and DIY projects.

Lay the board down with an overlap of approximately 2 inches then secure with any construction tape.

Nominal Size 317 SQ. FT.

Note: V-PRO Floor Protection is not suitable for newly laid floors such as porous stones, natural stones, clay tiles, and concrete.
