

Letter of Recommendation

Sudlow Concrete, Inc.
4934 Lavista Road
Tucker, GA 30084
(404) 450-3753

To Whom It May Concern,

In March 2023 the Church of Jesus Christ of Latter-day Saints contracted with Sudlow Concrete, Inc. to remove our asphalt loading dock area and pave it with concrete. This work included demo of asphalt paving, removal of subbase materials, grading, drilling and epoxy rebar into adjacent concrete structure, rebar mat, pouring/finishing/curing concrete to specifications, green cutting control joints and construction joints.

The church has very high standards for all construction process and stringent specifications. Sudlow Concrete, Inc. meet and exceed our expectations on this project. The demo and site work were done quickly, and the project site was always in a neat and orderly fashion. The grading and layout work was done exactly to our plans. The concrete was poured at a 4-inch slump per our specifications and the quality of the finish was exceptional. Most importantly, the concrete curing process was followed to ensure a quality long lasting product.

The Church of Jesus Christ of Latter-day Saints was very pleased with the work, craftsmanship, and professionalism of all Sudlow Concrete, Inc. personal. The office staff support the paperwork and administrative part of the project while the onsite crew followed the plans and specification with exactness.

I would highly recommend Sudlow Concrete, Inc. for any commercial concrete project. We are grateful for the relationship that we have with them. We know that you will find in them the same qualities that we have experienced, namely integrity, transparency, professionalism, quality, and exactness.

Sincerely,

L. Blaine Hoopes
Project Manager, North America Southeast Region
